SPORT ARENAS

MULTI USE GAMING ARENA

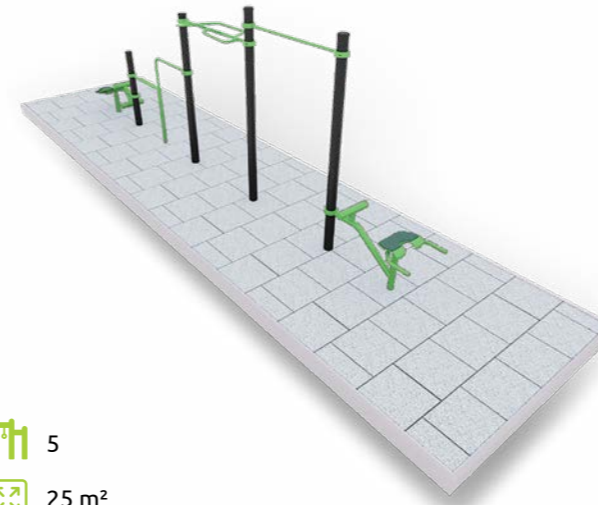

The BESTRONG football box consists of 12 mobile, weatherproof elements made of galvanized steel, which are quickly and easily installed.

The box has a height of about 2.15 m and a diameter of 5.6 m. The lower section has a height of about 1 m and consists of impact-resistant plywood sheets with a thickness of 18 mm on both sides. Metal meshes made of polypropylene material with a thickness of 4 mm are resistant to ultraviolet radiation.

Gate size: 1 x 0.5 m. One element of the panel is equipped with a door with a stainless steel hinge.

LIMACO

playground set

MATERIALS:

Made of stainless steel AISI 304 which is durable during any atmospheric conditions and intensive exploitation. The walls, sides, and roof are made of HDPE materials. The floor is mainly produced in black HPL however, we have a special offer for our customers from warm countries. It's possible to produce the Limako line in HPL materials for roofs and walls.

PARK

playground set

MATERIALS:

Facilities made of hot, galvanized steel, then powder-painted which help to provide stability and longevity for any playgrounds. The main colours which dominate in Park line are grey, yellow and red. For our devices, we use HDPE for colour materials as roof, side of slide and climbing wall.

PE material with anti-slip covering we use for platform and climbing ramp in climbing frames products. All products have a certificate in full compliance with the norm EN 1176.

ROTO

playground set

MATERIALS:

Playgrounds provide exciting learning opportunities that build a child's self-confidence and let their creativity flourish. Outdoor play allows children to explore and interact with their world, all while getting much-needed fresh air and physical activity.

Products from Roto line are made of galvanized steel, then there are powder-painted which helps to provide stability and longevity for any playgrounds. Red platform floor which you could find in carousels, spinners and climbing frames is covered by anti-slip PE plate. Thanks to this solution the roundabout's floor is soft and safer in use. It does not heat during sunny days and is not freezing during the winter.

We're the supplier of the high-quality products which are dedicated to children of any age. For us, the most important things are safety during the play and happiness of children. In Roto line, you could find roundabouts, hanging roundabouts, spinners, net structures, swings, seesaws, cableway and climbing frames. All products have a TUV certificate according to norm 1176.

**AKRA**
playground set**MATERIALS:**

The AKRA series is a high-quality and perfectly processed range of playground equipment for public spaces.

The products are characterized by vivid colors and graphic drawings on the sidewalls and the roof. It should encourage children to play.

The structure is made of black, corrosion-protected steel. Therefore, it is resistant to weather conditions and intended for intensive use in public playgrounds. The platforms are made of HPL with a non-slip texture to ensure safe play for children.

MONTO

various lengths of slides and tunnel tubes

MATERIALS:

Matt stainless steel (0304), the thickness of steel plate 2mm.
Foundation legs made of stainless steel.

Slides: Great fun with Inter-Play ground slides installed on natural hills is possible now. Various dimensions of these products are available and customized versions can be prepared on request as well. MONTO slides can be offered as a ground product, however, also like stainless steel slide mass production options for your climbing sets.

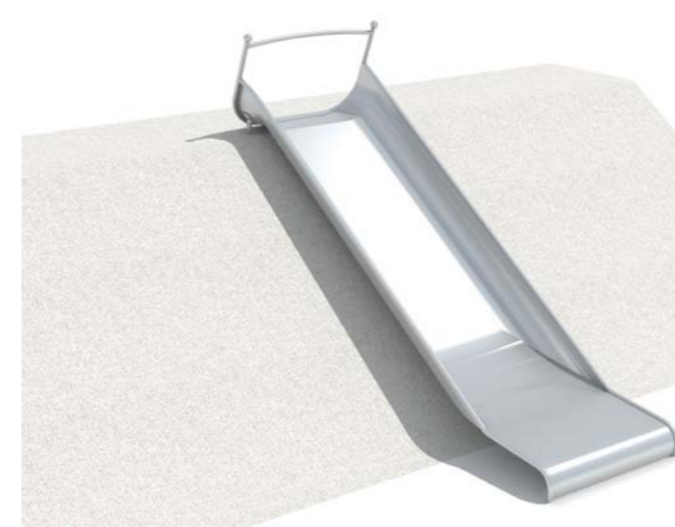

Tunnels: The underworld can be explored now. Install MONTO tunnel inside the ground and let children discover secret passages to hidden treasures!

TRAMPOLINES

playground trampolines

MATERIALS:

The jumping mat is made of lamellas coated with resistant and anti-slip material. The elastic collar around the jumping mat is made of SBR or EPDM rubber, which is durable and long-lasting. The chest is made of galvanized steel. Top-quality trampoline for long term outdoor use for all year; can be left even in the wet condition. The trampoline is equipped with galvanized springs and a weatherproof jumping mat. Set of 4 trampolines for playgrounds that are intensively used. The set contains 4 quarter shaped trampoline. The jumping mat is available in 8 colors and many patterns to choose from. Springs are made of galvanized steel, which is located around the jumping mat and connects the mat with an internal galvanized chest.

Color EPDM

SPORT SYSTEM

outdoor facilities

MATERIALS:

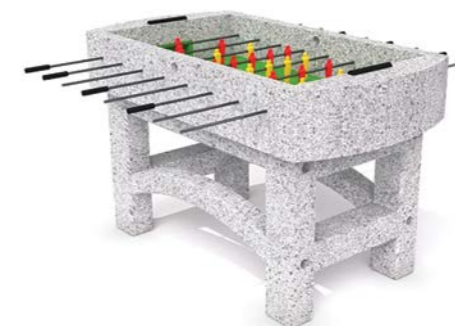

The top of the table and legs are made of high-quality concrete.
The construction made of galvanized steel.
Concrete prefabricated foundations are added.
The construction made of pipe 48,3x2,9 mm and 38x2,6 mm.
The net of the goal made of metal rods fi 12 mm and fi 8 mm and chains fi 5 mm.

TENNIS TABLE 1 (Art. KT-02-CR-007/008)

8,74 x 5,6 m

FITNESS

Outdoor sports devices

MATERIALS:

Construction is made of powder painted steel and protected against corrosion. Steps are made of aluminium. Handles are made of pipe ended with rounded decorative elements and profiled to ensure ergonomics and user safety. Construction is welded and has no plastic ends except for bearing connections where it is possible to maintain/repair. The device is mounted on a supporting pole, that is attached to the ground by the flange. The flange is screwed with M16 screws into anchor fixed in the concrete. Anchoring nuts are secured against unscrewing.

STREET WORKOUT

sport equipment

MATERIALS:

Galvanized and powder painted steel - the devices are painted in green (RAL 6003) and grey (RAL 9006). On request other RAL colors may be used.

Construction posts with square profile 80x80 mm (thickness 3 mm).

Screws covered by polymer caps.

WATER SLIDES AND AMUSMENT PARKS POL-GLASS

WATER SLIDES

equipment for water parks

MATERIALS:

Our hard joints are specially designed vertical flanges which connect components of a water slide. The gap between the vertical flanges in the bottom part of a pipe is filled with a glue/sealer, so that the surface of the water slide is flat and smooth. A perfectly smooth surface of the water slide ensures comfort of use and minimizes maintenance, as compared to soft joints (where gaps between particular elements are filled with a sealing substance). A dedicated system of locks supports the water slide and keeps its components firmly in position, as fitted.

Seamless tubes are the latest technological solution from Pol-Glass. These water slide components, made without a seam on the side, are a way to eliminate the hotbed for fungi and bacteria. They also require less maintenance and are more aesthetic than seamed tubes.

The thermal insulation system consists of laminate casing with a smooth surface finish, filled with insulating polyurethane foam sprayed on the inside. The 3 cm thick polyurethane insulation is coated with laminate. On the joints of particular water slide components, the casing components are connected with laminate bands fitted separately. The casing system does not require any maintenance, except for some inspections carried out in accordance with the water slide instruction manual.

OPEN SLIDE „U” TYPE

- ↔ 800, 1000, 1200 mm
- ♻️ 120 m³/h
- △ 10-13 %

TUBE SLIDE

- ↔ 800, 1000, 1200 mm
- ♻️ 120 m³/h
- △ 9,5-13 %

FAMILY SLIDE

- ↔ 2200, 3000, 4000 mm
- ♻️ 60, 90, 120 m³/h
- △ 15 - 25 %

Its construction is designed for individual and group slides which will undoubtedly make every object, equipped with it, more attractive and also making it more friendly to families with children. Wide track for sliding and small slope of the slide allow to enjoy sliding with all safety measures taken. Its versatile character allows it to be installed indoors as well as outdoors which means it can be used for a whole year. It does not require to install a special landing zone, which allows to install it in the existing objects making it even more attractive for the users.

SPACE BOWL

-  6500, 8800 mm (bowl)
-  800, 1000 mm (tube)
-  210 m³/h
-  13-15 % (outlet)

An untypical slide of a specific structure: created for aqua parks. The whole slide is divided in three stages:

1. Gathering speed stage in the relatively long and steep section;
2. Repeated centrifugal rotation in the onion-shaped bowl;
3. Free fall to the pool below or, alternatively, end of slide at the tube stage. Similar to its bigger counterpart Space Bowl, it is possible to combine it with the other slide or pool.

SPACE BOWL JUMBO WITH OUTLET

-  12000 mm (bowl)
-  1400 mm (tube)
-  540 m³/h
-  10-15 %

This is a structure, which only to a small degree resembles the standard slides and because of that, it attracts attention. The users during the slide are thrilled and when the tube slides up, they hit a huge funnel in which they are spinning around the outlet located in the centre of 'the onion' and to finally slide downwards to the outlet. An additional attraction of this structure is the possibility of connection the outlet with another slide making it even more attractive. In case of Space Bowl 8800, the size of a bowl makes the time of being inside the bowl longer and consequently makes the fun last longer.

OPEN SLIDE PENDULUM

-  16,5 x 20,0 x 9,5 m
-  280 m³/h
-  45-50 % (outlet)

The Pendulum is another slide of relatively atypical construction and therefore, it makes more attractive the facility it is going to be installed in. The name itself suggests what can be expected when using this type of slide. The user goes inside the construction with steep slopes and high walls, where, on the pontoon, he is sliding on both walls interchangeably. The slide is a great attraction for those liking extreme experiences.

WATERSLIDE INFINITI

-  2100 - 2500 mm
-  400 m³/h
-  10-13 %

Infiniti is a large slide of a new type, which construction differs from the standard types. Plenty of space inside the slide, up to 3.5 m wide allows several users to simultaneously take part in sliding. Infiniti offers different forms of sliding during which the users can decide to either use a pontoon or go without it. It is a closed structure allowing it to be used throughout the year and the extra audiovisual components make it to be even more attractive and enjoyable.

MULTILINE

-  1600 (2-lane)
2500 (3-lane)
3400 (4-lane)
>3400 (n-lane)
-  30, 60, 90, 120, 150 m³/h
-  13-20 %

KAMIKADZE

-  800 mm (TURBO)
1000 mm (KAMIKADZE)
1400 mm (KAMIKADZE)
-  120 m³/h
-  17-20 %

Kamikaze type of slide is kind of fun for people who like speed and groove. High speed of slide and open character of the slide bring the experience to a particular level of pleasure. As an extra feature, it is possible to build two or more additional tracks and thanks to it, there is a possibility of having a friendly competition between families or friends. The Kamikaze slide can improve the attractiveness of indoor as well as outdoor recreation centres. Kamikaze U 1400 is an open raft slide with very big slope, but simple flow of line.

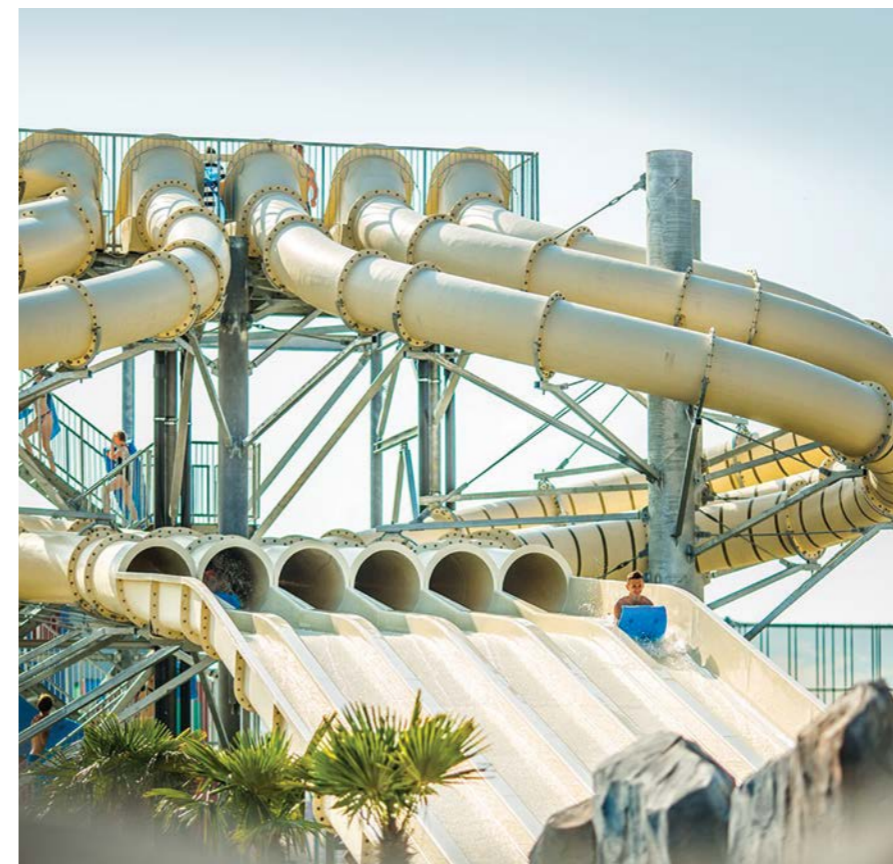

WILD RIVER

-  1345, 1400, 1600 mm
-  >240 m³/h
-  5-13 %

Wild River is a slide designed mainly for the outdoor use. Due to its size, its width in particular, the slide enables sliding of several people at the same time. Thanks to a little degree of slope the speed of sliding is moderate and with an open slide it gives us a chance to admire the surroundings. The Wild River makes the slide relaxing and calm during the free rafting in a pontoon. Undoubtedly, it is a slide that shall meet the user's expectations at any age.

TRACKER

-  800 mm (Inlet's)
-  700 mm
-  90 m³/h
-  16-30 %

RAFTING

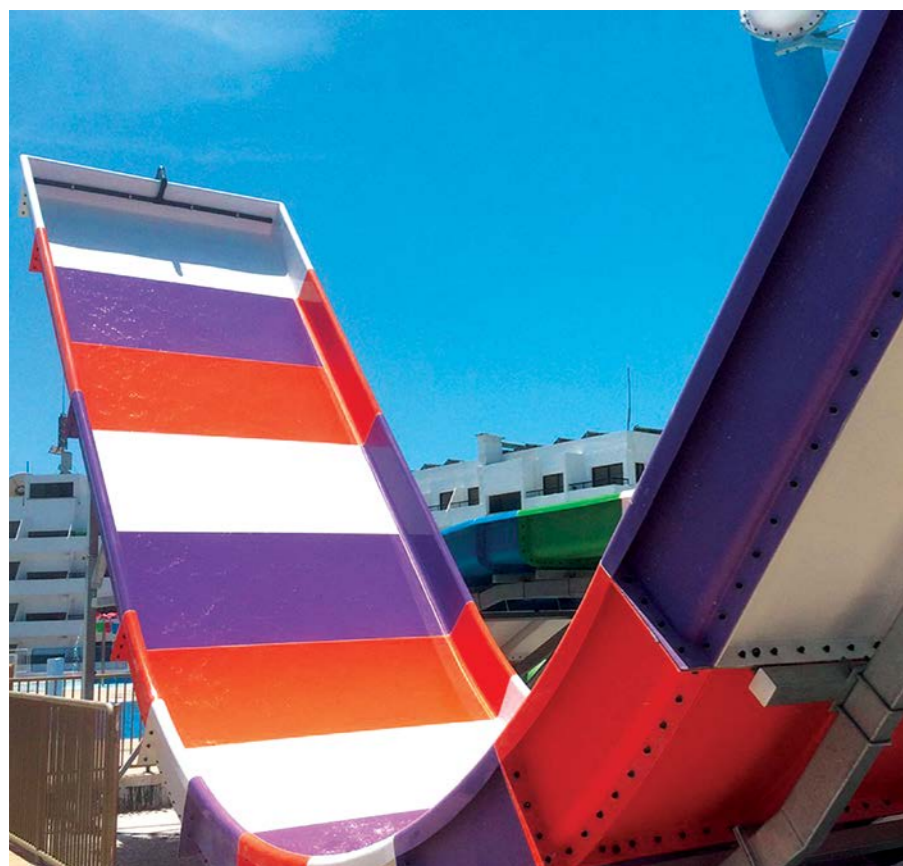

- ↔ 1400 - 2850 mm
- ♻️ 240 - 680 m³/h
- △ 10-13 %

BOOMERANG

- ↔ 800 mm (TURBO)
1000 mm (KAMIKADZE)
1400 mm (KAMIKADZE)
- ♻️ 120 m³/h
- △ 17-20 %

BIG WAVE

- ↔ 3100 mm
- ♻️ 175 m³/h
- △ 40 %

X-SCREAM and X-STREAM LOOP

- ↔ 800 mm
- ♻️ 120-234 m³/h
- △ 20-65 %

MINI ROCKER, ROCKER and GIANT ROCKER

-  1200 / 1400 / 2850 mm (Inlet's)
-  4900 / 4900 / 7375 mm (cone)
-  150-160 / 240 / 1120 m³/h
-  10-13 / 9-11 / 9-11 % (Inlet's)

SETS OF WATER SLIDES

- 5 - 6,125 m

MULTIMEDIA EFFECTS

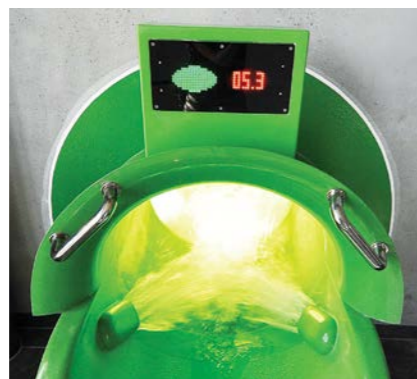

applied technologies

A dark tunnel which ends in a swimming pool or a tub may be fitted with daylights, which let in the daylight through its coloured walls. Such natural effects may take various forms, depending on the intensity of daylight. No power supply is required to achieve this dynamic experience rather than a static effect. Looked at from the outside, diverse patterns of daylights make the water slide a unique structure. All multimedia effects used with water slides from Pol-Glass are based on the state of the art multi-LED technology. This innovative, unique solution enhances both the attractiveness of water slides and the safety of end-users. To increase the safety of use, it is recommended to fit a water slide with signalling lights. Start and stop lights signal when it is safe to go down to the swimming pool or tub at the end of the tunnel (green light), or when the user has to wait for their turn (red light). The signalling lights use LED diodes which have a significantly longer life cycle than conventional lighting.

DAYLIGHTS

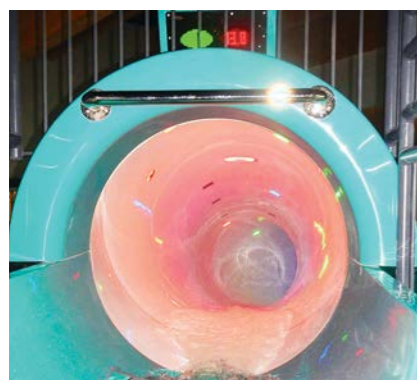

SIGNALLING LIGHTS

MULTIMEDIA

PAINTBALL

Who said you can't play while going down the water slide?
The goal of the game is to diversify the fun, find and hit the target points that are distributed along the entire length of the slide.

MEDIA EFFECTS SELECTION PANEL

«STORM» mode:

To the sounds of rain and thunder, the descent of the water slide begins, surrounded by lightning, strobe lights and a rainbow at the end.

«AIRPORT» mode:

Multi-colored LED-backlight tracks move in two directions, like at an airport, under the noise of an airplane taking off.

«POLICE CHASE» mode: Police siren and red-blue strobe lights.

«STARDUST» mode:

Relaxing music theme and starry sky effects.

WATER PLAYGROUNDS

children's playgrounds for water parks and swimming pools

MATERIALS:

Supports: galvanized steel with high-strength coating.

Slides: fiberglass.

Maximize the number of water play opportunities with more entertainment, interaction and surprises to explore! Our Water Playgrounds are the spaces of greater involvement, brimmed with water fun, happiness and joy for every of their users. Basing on investigations, exploration and discoveries, the meticulously designed structures are giving the feeling of inventiveness and adventure. No matter of the users' age or available space, we can adapt our Water Playground solutions to any most exigent demand. Mark the difference and the personality of your business by using our endless imagination on theming options for your future water playground.

PIRATE SHIPS

Water play slides of this series are completed according to individual requirements and sizes of the customer.

CASTLES

Water play slides of this series are completed according to individual requirements and sizes of the customer.

TODDLER POOLS FOR KIDS

modular pools for outdoor and indoor water parks

Pol-Glass modular toddler pools for children will make your facility an attractive place for people of all ages. Fiberglass toddler pools are safe, durable, functional and visually attractive. Regardless of the amount of space you have at your disposal, modular toddler pools provide endless possibilities both in terms of arrangement and integration with existing infrastructure of your facility. Give the youngest a better quality of fun in water - create a creative play space for children that will definitely attract entire families.

SPRAY PARKS

for outdoor and indoor water parks

From themed pieces like animals and pirate ships to classic fountains, mists and more. Emphasizing quality, safety and thoughtful designs, Pol - Glass spray parks are built to delight and entertain for years to come.

WATER ATTRACTIONS

for swimming pools and water parks

For full range emotions and fun, take a look at our incredible collection of water attractions. Choose from a variety of pool play essentials including water cannons, raining mushrooms, water wheels and jets built to fit pools of all sizes. Encouraging imaginative play, they have the ability to create the limitless magic of water fun and give the confidence to explore and learn in a secure and safe space. Shouldn't you find the attraction perfectly fitting your business plan, feel free to contact us for personalized solutions.

WAVE GENERATOR

The wave generator is a professionally designed device with advanced technologies that make this attraction stand out from the crowd. Based on the principles of the laws of physics, the work of a wave generator is to use its force in a pool, which in turn creates the movement of water, generating waves of different sizes.

WATER BALLOON

It's just necessary to climb on top as many times as possible and the water fun will start. Based on options range of climbings, jumpings, concentrating, slidings and splashings, an exciting experience for novices as well as experienced climbers are ensured and guaranteed. It is a highly durable, safe and low-maintenance entertainment, which will provide a lot of fun to all age groups.

ARTIFICIAL ROCKS

These long lasting and very realistic creations are suitable for display use and landscaping, especially where access is difficult and weight restrictions apply. Pol – Glass specializes in the design and the production of laminate rocks destined especially for Aquaparks, theme parks and SPA zones. Suitable for indoor and outdoor applications.

ACCESSORIES

Pontoons to water slides. Inflatable circles and rafts are simply irreplaceable on water slides and attractions. We offer pontoons for one, two or more users. Only high-quality materials and a large selection of colors.

MODULAR CHILDREN'S POOLS JOEF

CANAL PLAY

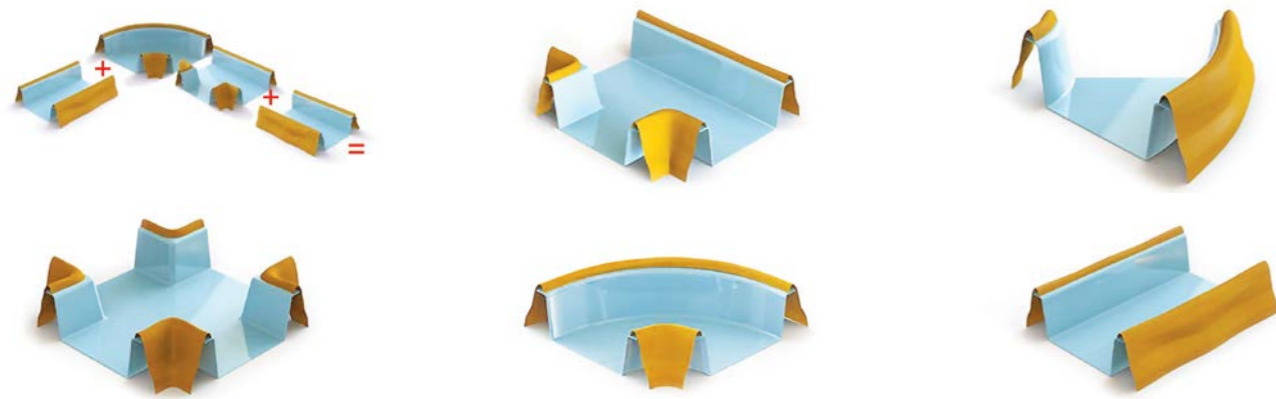

modular canal elements

CANAL PLAY is something new! A classic kiddie pool, but with many more possibilities. CANAL PLAY is a 'network' of canals in which children can move and play with water. The canals have splits and intersections and connect with a 'harbour', a larger water area, and between the canals there are islands the children can climb onto or reach via a bridge. In and around the canals, on the islands and in the harbour, there are all kinds of toys to discover.

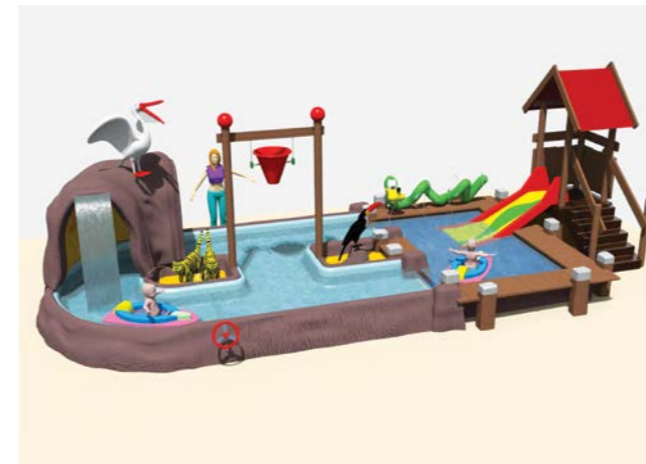

Children can sail through the canals with a boat or other foam toy, and they can run, swim, climb and scramble through the canals and on the islands to reach and play with the many features. There is a wide range of water-spraying features to choose from.

The CANAL PLAY design is created in consultation with the customer. With modular canal elements, the design can range from small to large, with many versions and shapes.

MODULAR SYSTEM:

WATER ATTRACTIONS

for swimming pools and water parks

A great addition for children's pools and water parks is a variety of themes, color palette and effects of water toys and mini-attractions. Little visitors will be delighted with the fun game among the grottoes, figures of animals and birds, water cannons, waterfalls, islets and slides. High quality, safety and thoughtful design guarantee that these elements of the pool will delight and entertain your guests for many years.

MOBILE BATHROOM PB

exclusive private bathroom

Over the past few years, people have attached increasingly more importance to their privacy. Private sanitary facilities are therefore very much on the rise at camping sites. People are also willing to pay a little extra for this. Moreover, in the wake of the recent CORONA crises, public toilets and showers now pose a risk as well, whereby private sanitation is absolutely a solution – or even a necessity. Unfortunately, this virus may remain a threat for some time to come, so investing in safe private sanitary facilities is a good idea! Your camping site can then simply always stay open, and by offering a private bathroom with a spacious walk-in shower, washbasin and toilet, your campsite guests not only get to enjoy a sense of safety, but also a pleasurable level of luxury. The PÉBÉ, "Private Bathroom" also looks nice, with an appealing round design rather than a rectangular block and can come in many different colours. You can choose your own colours.

EQUIPMENT:

- a playful appearance, attractive and distinctive shape;
- colours and colour schemes according to your preferences, plenty of options, we make it according to your choices;
- The PÉBÉ is made entirely of glass fibre-reinforced polyester, which is optimally resistant to moisture, this material is very durable and has a long service life;
- thanks to this choice of material, round shapes are possible without any (dirty) corners so that optimal hygiene and ease of cleaning are assured;
- the industrial production process uses molds to ensure that the price remains very affordable;
- ventilation is good owing to the space between the roof and walls;
- water drains off properly via a sloping floor which faces a drain;
- the floor is not slippery and has an anti-slip surface;
- due to the circular shape, there are few corners, therefore it is easy to clean everything thoroughly.

PB STANDART (Art. 0104)

209 x 209 x 335 cm

STANDART model can be completed bench and kitchen sink, which are installed outside the bathroom.
