

Wall-Holla

Space-saving vertical,
urban play structure

 LAPPSET®

design
award 2006
nominee**

Vertical adventure in a confined space

Wall-Holla – the urban, vertical and space-saving play structure is an ideal solution for environments that don't have the space for the large footprint of traditional playground.

Wall-Holla offers an amazing amount of capacity by inviting 21-42 children to play simultaneously, while only taking from 50 to 100 m² of space.

An eye-catcher

The high and see-through structure provides a lot of fun and excitement for play. For the same reasons Wall-Holla is a constantly changing work of art and therefore a great centerpiece for various environments.

Very exciting, but safe

Wall-Holla spans a wide age range. The completely transparent structure allows parents to always have an eye on their children.

Wall-Holla conforms to the European safety standards for playground equipment EN 1176.

1176

Various possibilities for customisation

Wall-Holla can be customised in your favourite colour combination to match the colour theming of your venue. Naturally you can choose the size and features from our wide selection of Wall-Hollas.

The play structure can be upgraded with slides, fireman's poles, hydraulic drop zones, where the player slowly floats downwards with a slight turning movement, and other customised extras.

Climbing holds allow vertical and horizontal climbing along the outer wall.

The EPDM-surface of the undulating ribbons is suited for playing, sitting and climbing.

At irregular intervals there are openings to climb through so that children can leave or enter the play

Wall-Holla is a perfect solution where the space is limited but high capacity needed

7 modules: approx. 8,3 metres long.
Safety area: 11 080 x 5 180 (52,4 m²)
Capacity: 21 persons

10 modules: approx. 11,5 metres long.
Safety area: 14 558 x 8 114 (80,2 m²)
Capacity 30 persons

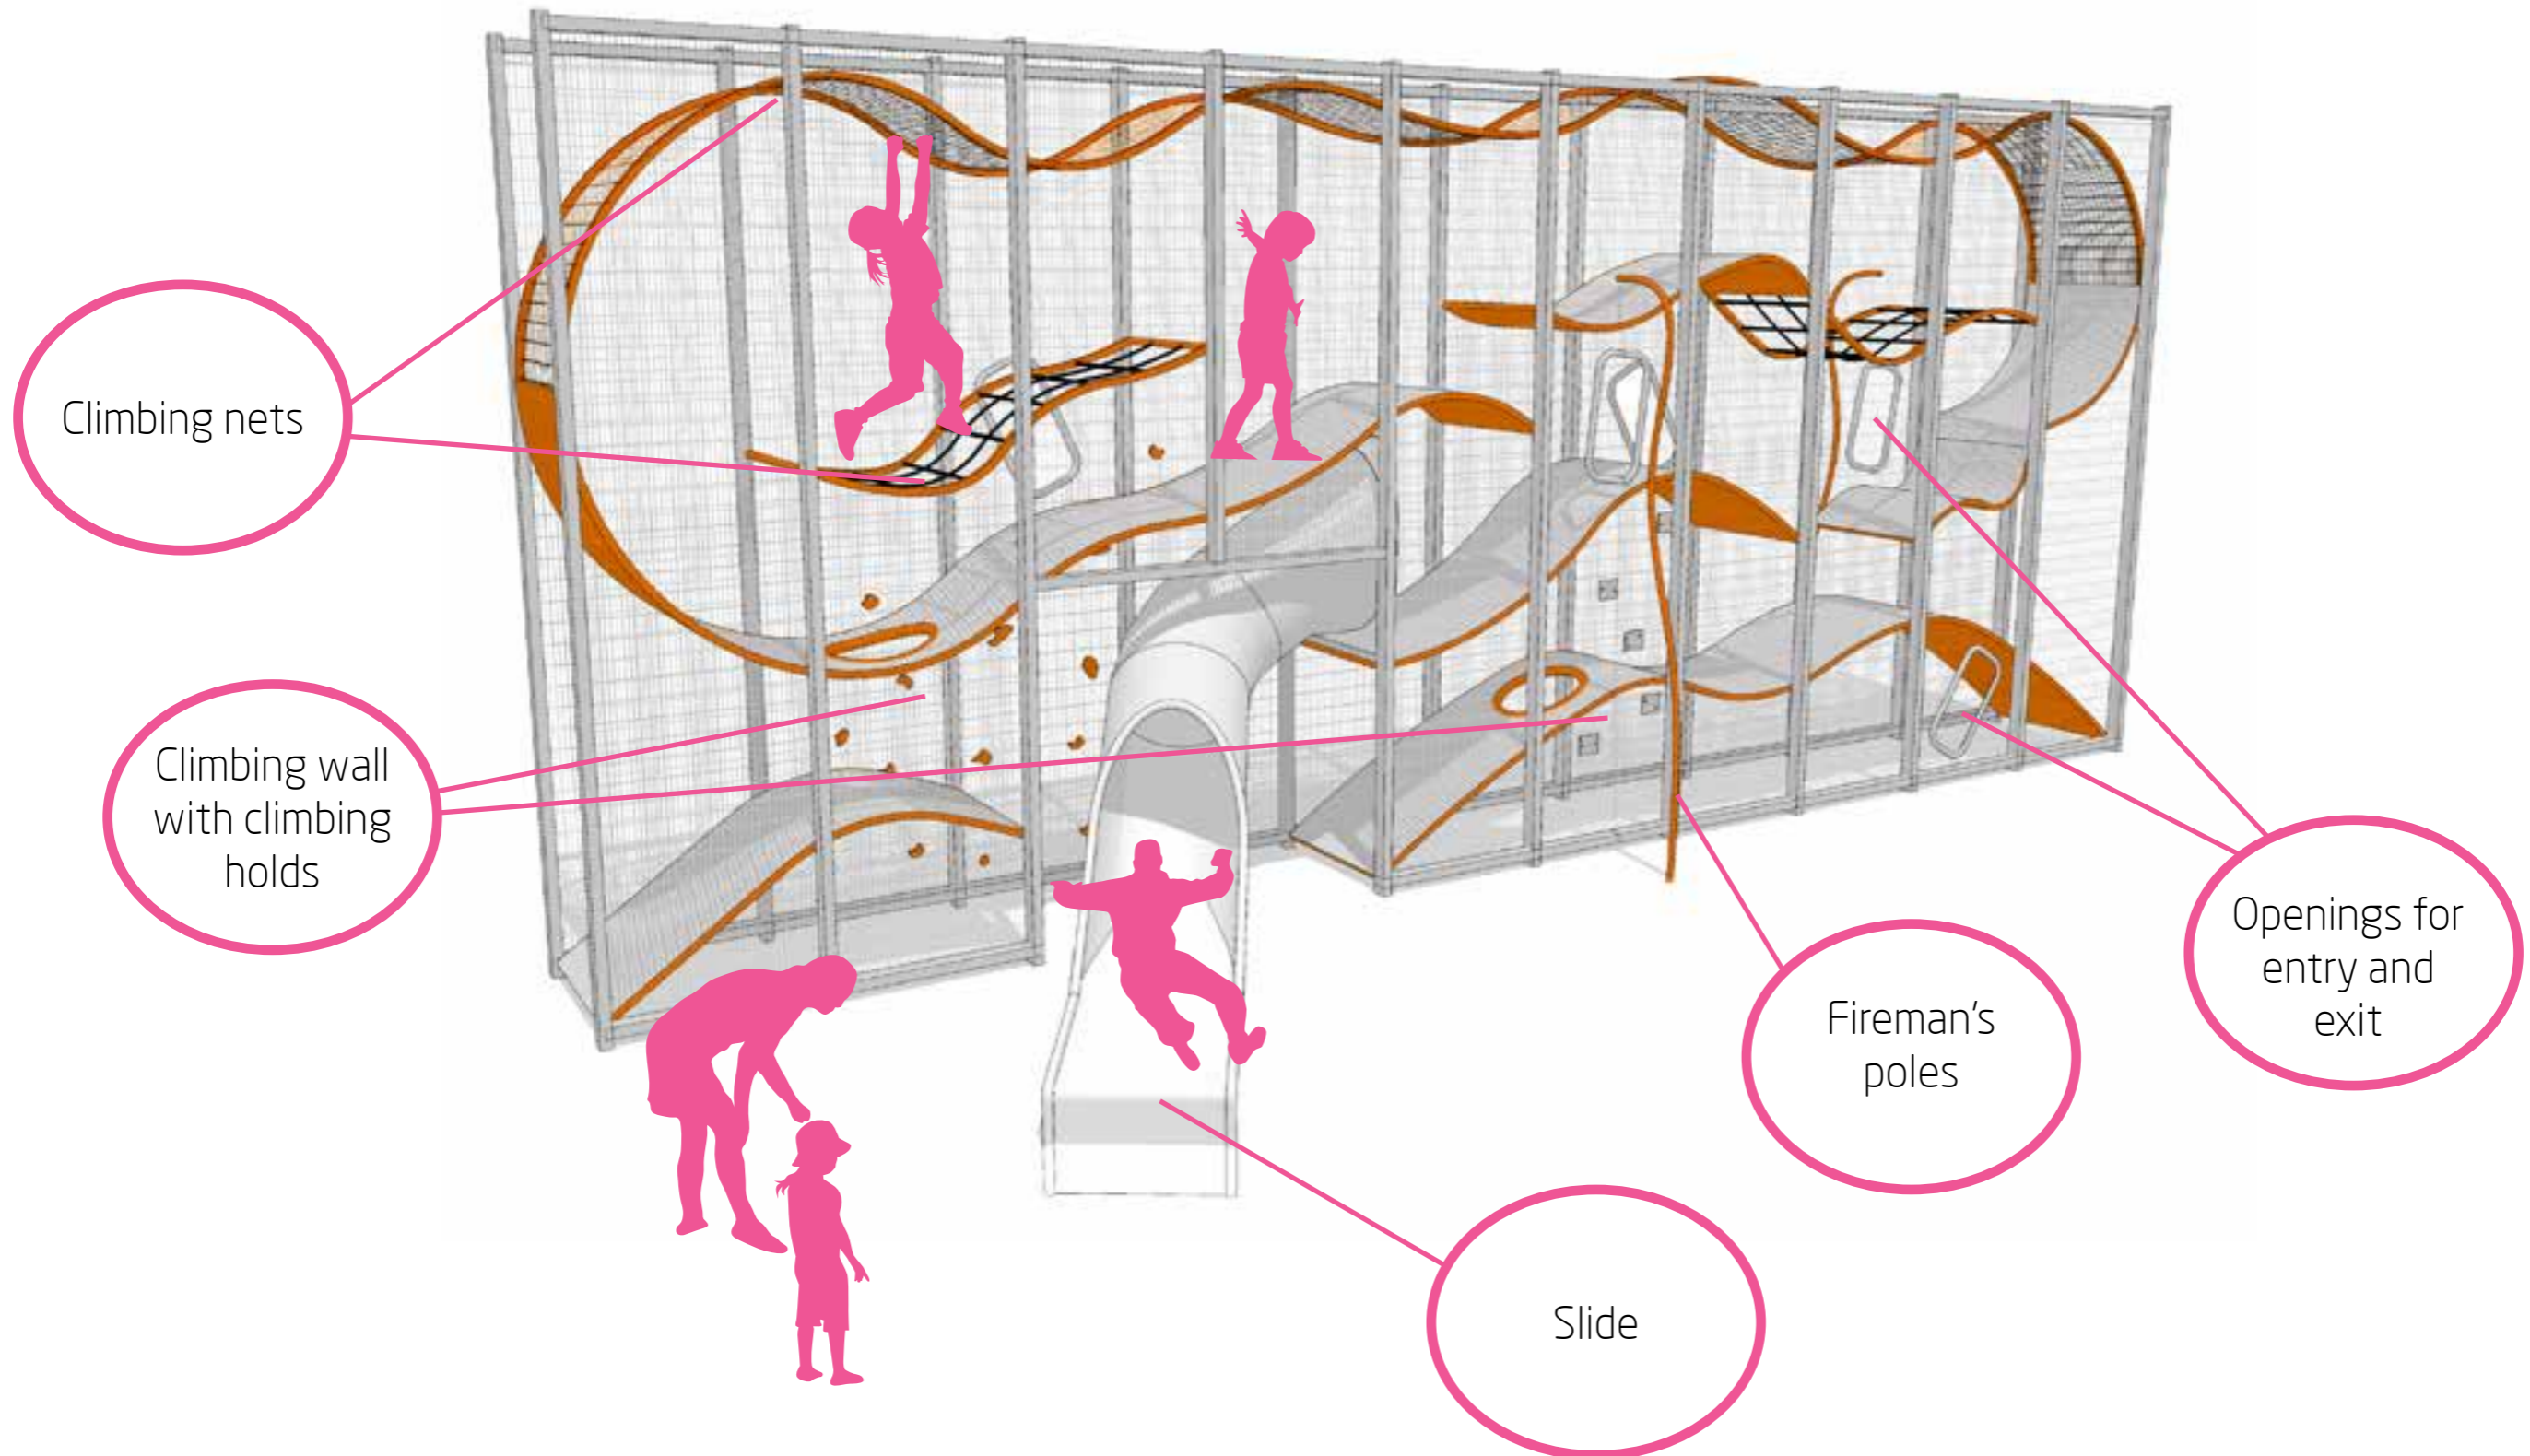

14 modules: approx. 16,2 metres long.
Safety area: 19 160 x 6 241 (92,5 m²)
Capacity: 42 persons

Multi-functional play structure

Wall-Holla combines exciting play functions in a compact package.

Heavy duty welded mesh, hot-dip galvanised and powder coated

Roof mesh:

Heavy duty welded mesh, hot-dip galvanised and powder coated

Platform surfacing:

4mm pre pressed EPDM mat

Platforms:

Steel construction spray galvanized and double powder coated

Net construction:

7-string polyferro ropes
Ø16mm thick

Optional slide:

Glass bead-blasted stainless steel
tube slide

Climbing grips:

Epoxy-cast climbing grips arranged
according to the Fontainebleau climbing
scale

Inspiration

First Wall-Holla in France, Musée du Jouet, Moirans en Montagne

The first Wall-Holla in France was installed in 2012 at Musée du Jouet.

The colour theme and the location of the play structure match the local environment perfectly.

France

Wall-holla is available in your favourite colour combination to match the colour theming of your venue.

World's biggest Wall-Holla,
Ketteler Hof leisure park,
Haltern am See, Germany

The world's biggest Wall-Holla was especially designed to the leisure park Ketteler Hof, Germany, in 2013. The Play Park Ketteler Hof is a family-owned business. The customer was looking for something different, and together we planned a customized solution including a 36-metre-wide Wall-Holla with three Drop Zones for the leisure park.

DropZone:
slowly descending
and rotating lift.

Round holes
in the surface
allow the user
to climb up
or down.

Tailor-made Wall-Holla
"Stone and wood" at
Hemsbach, Germany

Spain

The vertical structure unites several functions which appeal to various age groups including lounging spaces, sliding, a crawl-through maze and climbing wall.

The Netherlands

The surface changes to become rope mesh or simply open grid, where appropriate, to create a dynamic space within the structure.
